

2009

Iam making an application to register under pathway 1 or 2.

I have read the following definition of complex building from the Registered Architects Rules 2006

6 Definition of complex building

For the purpose of rule 7, a **complex building** is a building that—

(a) involves elements of high rise or large span, or both, requiring specialised or innovative structural solutions or of low rise requiring highly specialised knowledge;

and

(b) exhibits 1 or more of the following characteristics:

(i) is demanding in its ordering and organisation of multiple occupancy or special purpose user requirements, or both, in terms of people and vehicular circulation:

(ii) is complicated in its spatial articulation:

(iii) is complex in the planning and co-ordination of complex construction systems, materials, building services, and fittings:

(iv) is challenging in site configuration and existing features; and

(c) has a significant impact on the natural and built environment and requires an informed response with respect to the urban or rural context and the physical, topographical, and climatic context.

I consider that my project* (name)fits the definition of a complex building project for the following reasons (note: you may attach additional pages)

Signed.....

(*Note at least one project in the case study must be a complex building project)
